With its pleasant form and almost weightless, it snug-
gles up against your body and promises what only
headsets and Miniboxes do: You and your friends are
floated with music selected by yourselves – be it at
home, picnicking near the riverside, or on the way to
those locations. And all in high quality: undiluted,
galore and if you want: **loud.**

The concept of the BBOM Music backpack is as simple
as it is great: an ergonomic backpack in noble black
offers you lots of space for a laptop, a breadbox,
documents and others.

The stereo is placed at the bottom of the backpack
and you receive your songs via Bluetooth by any addi-
tional music source. There are two loudspeakers that
can be regulated up to 80dB, that surround you with
the soundtrack in compliance with your wishes – you
can listen to rock or soft music. Also contained at the
bottom of the backpack there is a powerbank which
grants you music non-stop up to 8 hours. It can also
be used as a battery charger, in case your phone
accumulator leaves you in the lurch once again. A bass
hole located under the powerbank accentuates the
sound additionally ...

For his smart look in diamond shape, the BBOM Music
Backpack has been awarded with the

Red Dot Award for Product Design 2017.

You should be the first music lover that goes through
the city with a stylish sound diamond!

The rocking back!
